

Introduction to UX

CMPT 363

“When creating great experiences, it’s not so much about doing what users expect. Instead, it’s about creating a design that clearly meets their needs at the instant they need it.”

— Jared Spool

What is user experience
design?

Topics to Explore

1. HCI, UI, IA, IxD and UX
2. Design Thinking
3. Usability and UCD

What is user experience design?

HCI, UI, IA, IxD, and UX

What is Human-Computer Interaction?

What is Human-Computer Interaction?

A field of study which strives to make interactions between people and computers more effective

LONG-TERM MEMORY

$\delta_{LTM} = \infty$
 $\mu_{LTM} = \infty$
 $\kappa_{LTM} = \text{semantic}$

WORKING MEMORY

VISUAL IMAGE STORE

$\delta_{VIS} = 200 [70-1000] \text{ msec}$
 $\mu_{VIS} = 17 [7-17] \text{ letters}$
 $\kappa_{VIS} = \text{Physical}$

AUDITORY IMAGE STORE

$\delta_{AIS} = 1500 [900-3500] \text{ msec}$
 $\mu_{AIS} = 5 [4.4-6.2] \text{ letters}$
 $\kappa_{AIS} = \text{Physical}$

$\mu_{WM} = 3 [2.5-4.1] \text{ chunks}$

$\mu_{WM*} = 7 [5-9] \text{ chunks}$

$\delta_{WM} = 7 [5-226] \text{ sec}$

$\delta_{WM} (1 \text{ chunk}) = 73 [73-226] \text{ sec}$

$\delta_{WM} (3 \text{ chunks}) = 7 [5-34] \text{ se}$

$\kappa_{WM} = \text{Acoustic or Visual}$

Use and Context

U1 Social Organization and Work

U3 Human-Machine Fit and Adaptation

U2 Application Areas

Human

H1 Human Information Processing

H2 Language, Communication and Interaction

H3 Ergonomics

Computer

C2 Dialogue Techniques

C4 Computer Graphics

C3 Dialogue Genre

C5 Dialogue Architecture

C1 Input and Output Devices

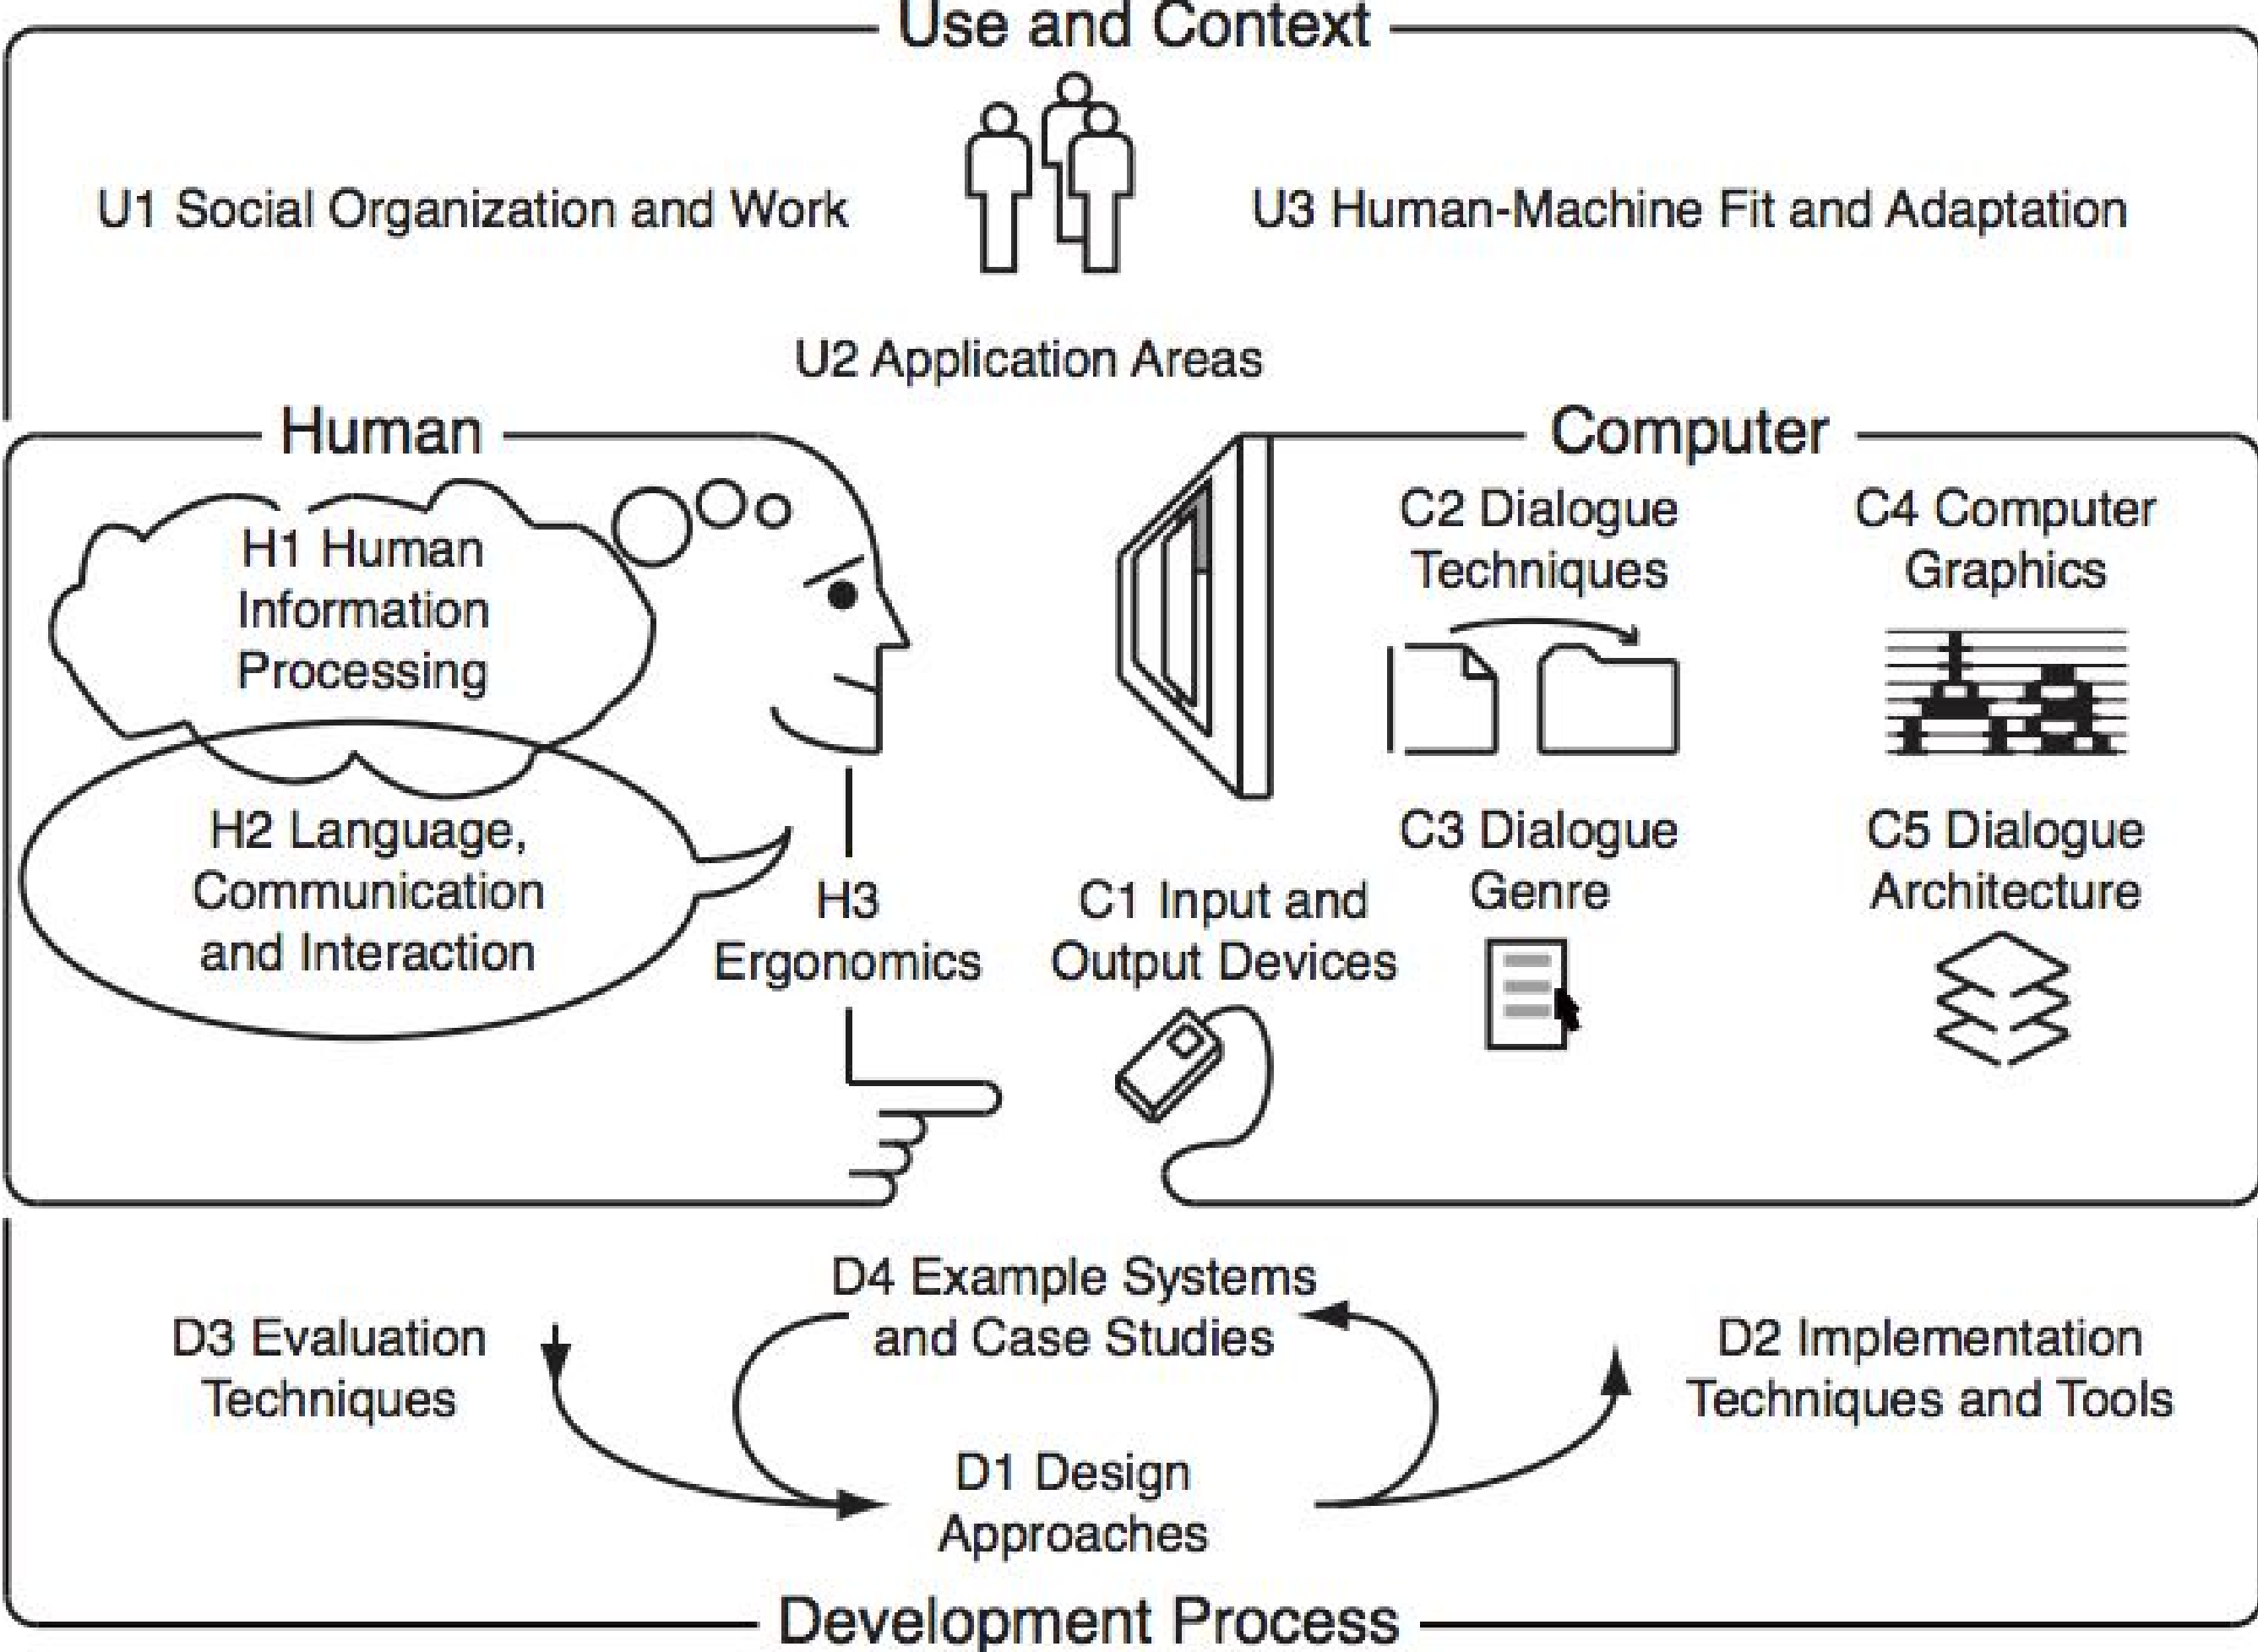

D3 Evaluation Techniques

D4 Example Systems and Case Studies

D2 Implementation Techniques and Tools

D1 Design Approaches

Development Process

Contemporary HCI Issues (Yvonne Rogers)

- Turn to design (user experience, enjoyment, play and pleasure)
- Turn to culture (human conditions and nature)
- Turn to the wild (augmenting people, places and settings)
- Turn to embodiment (practical engagement with social and physical environment)

Fitts Law

What is a User Interface?

What is a User Interface?

All elements which provide communication between the interactive system and the user

Low ← User Awareness → High

High ← Impact on Usability → Low

Low ← Technical Flexibility → High

What is User Interface Design?

What is User Interface Design?

User interface design is the process of supporting the goals of the user, ideally in a *friendly and articulate* manner

Activity: User Interface Design Case Study

What is Information
Architecture (IA)?

by sorting out things like this:

CLASSIFICATION
and HIERARCHY

LABELS and
TAGGING

NAVIGATION and
WAYFINDING

SEARCH

INFORMATION ARCHITECTURE

(IA for short)

connects

PEOPLE

to the

CONTENT

they're looking for

The 'content' people are looking for could be text, images, videos, whole documents....

...or even conversations...

...and other people.

IA also helps the people who create and maintain content do their job easier....

...and links content to other content to make it more usable and easy to find.

Next Up,
What is Interaction Design (IxD)?

Next Up, What is Interaction Design (IxD)?

The *structure* and *behaviours* of an interactive product, service, or system

Interaction Design Association: 2018 Interaction Design Awards

Founded by the Interaction Design Association (IxDA) in 2010 and first presented in 2012, the annual Interaction Awards celebrate design thought leadership and innovation around the globe. Each year, award recipients comprise a showcase demonstrating how interaction design impacts and improves human lives.

How Can We Define User
Experience?

How Can We Define User Experience?

“A person’s perceptions and responses that result from the use or anticipated use of a product, interactive system, or service.”

— ISO 9241-210

Activity: User Experience

THINK-PAIR-SHARE

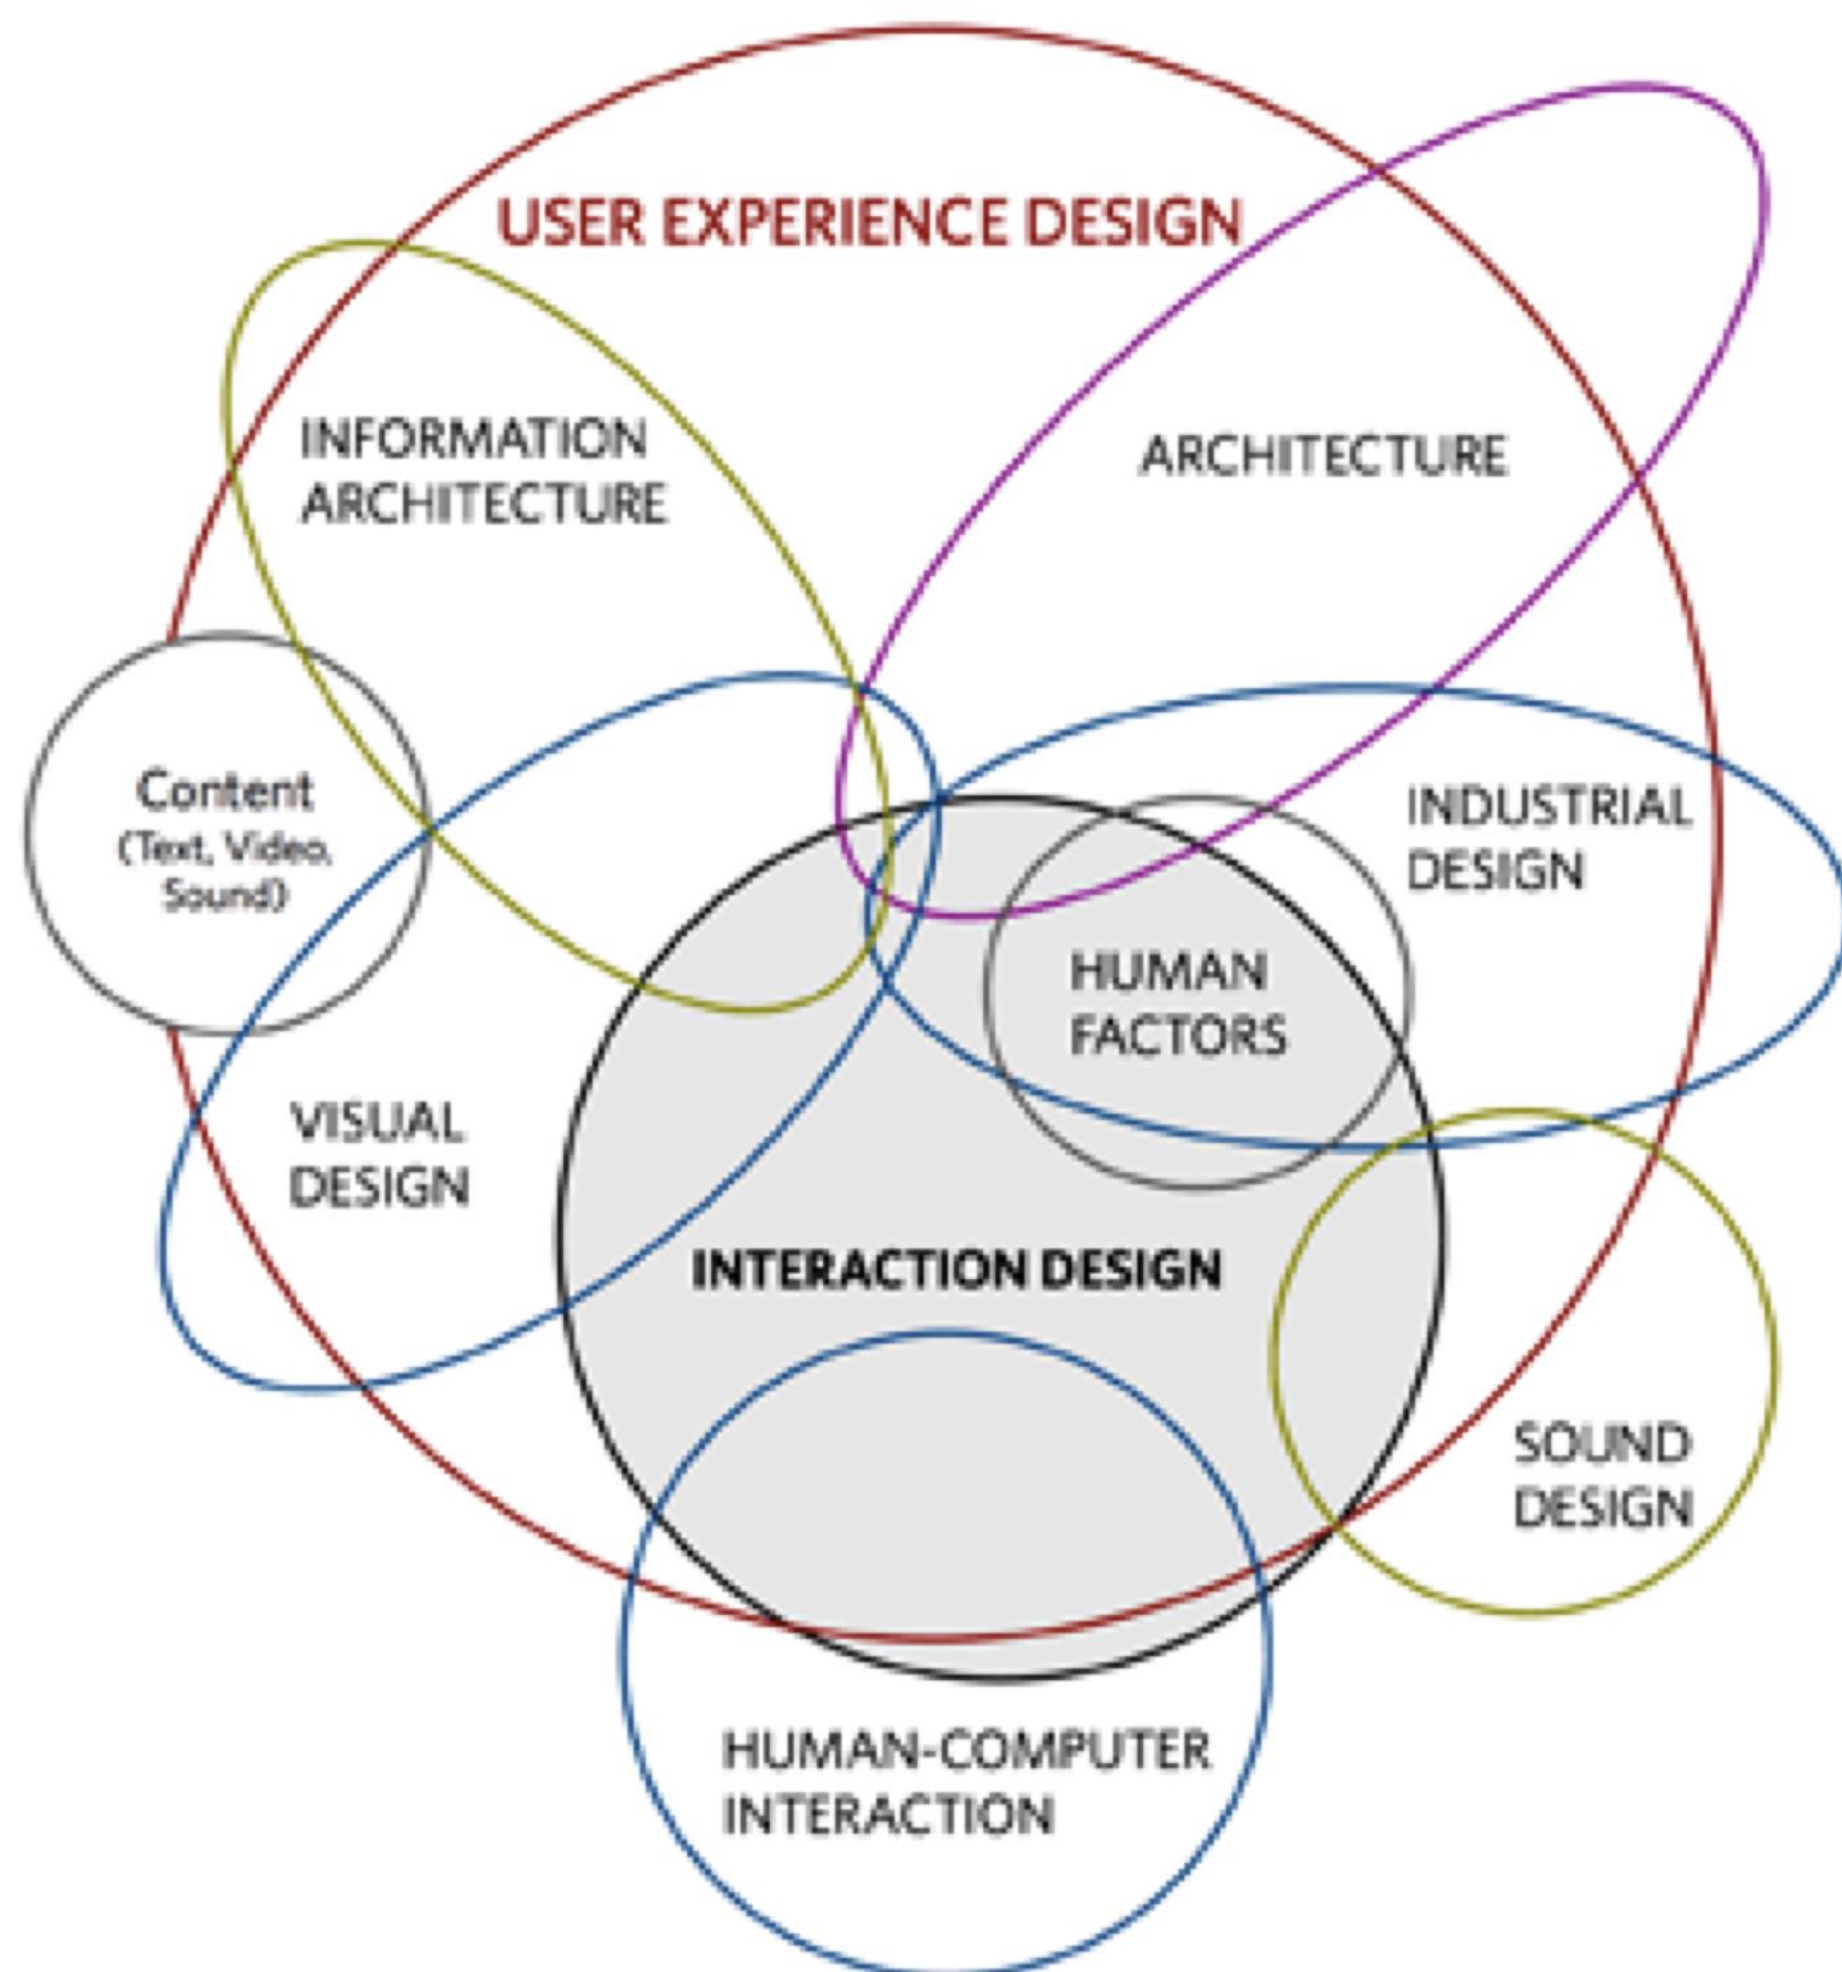

What are some examples of good or bad user experiences?

Time for Questions & Discussion

- What we've covered so far
 - What is human-computer interaction?
 - What is a user interface?
 - What is user interface design?
 - What is information architecture?
 - What is interaction design?
 - What is user experience design?
- Coming up
 - What is design thinking?

What is user experience design?

Design Thinking

What is Design Thinking?

- Not a type of thinking, but more of a mindset
- Process plays a role, similar user-centered design
- Anthropology and Sociology also play a role

Design Thinking

“Design thinking is a human-centered approach to innovation that draws from the designer’s toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success.”

—Tim Brown (President and CEO of IDEO)

DESIGN THINKING

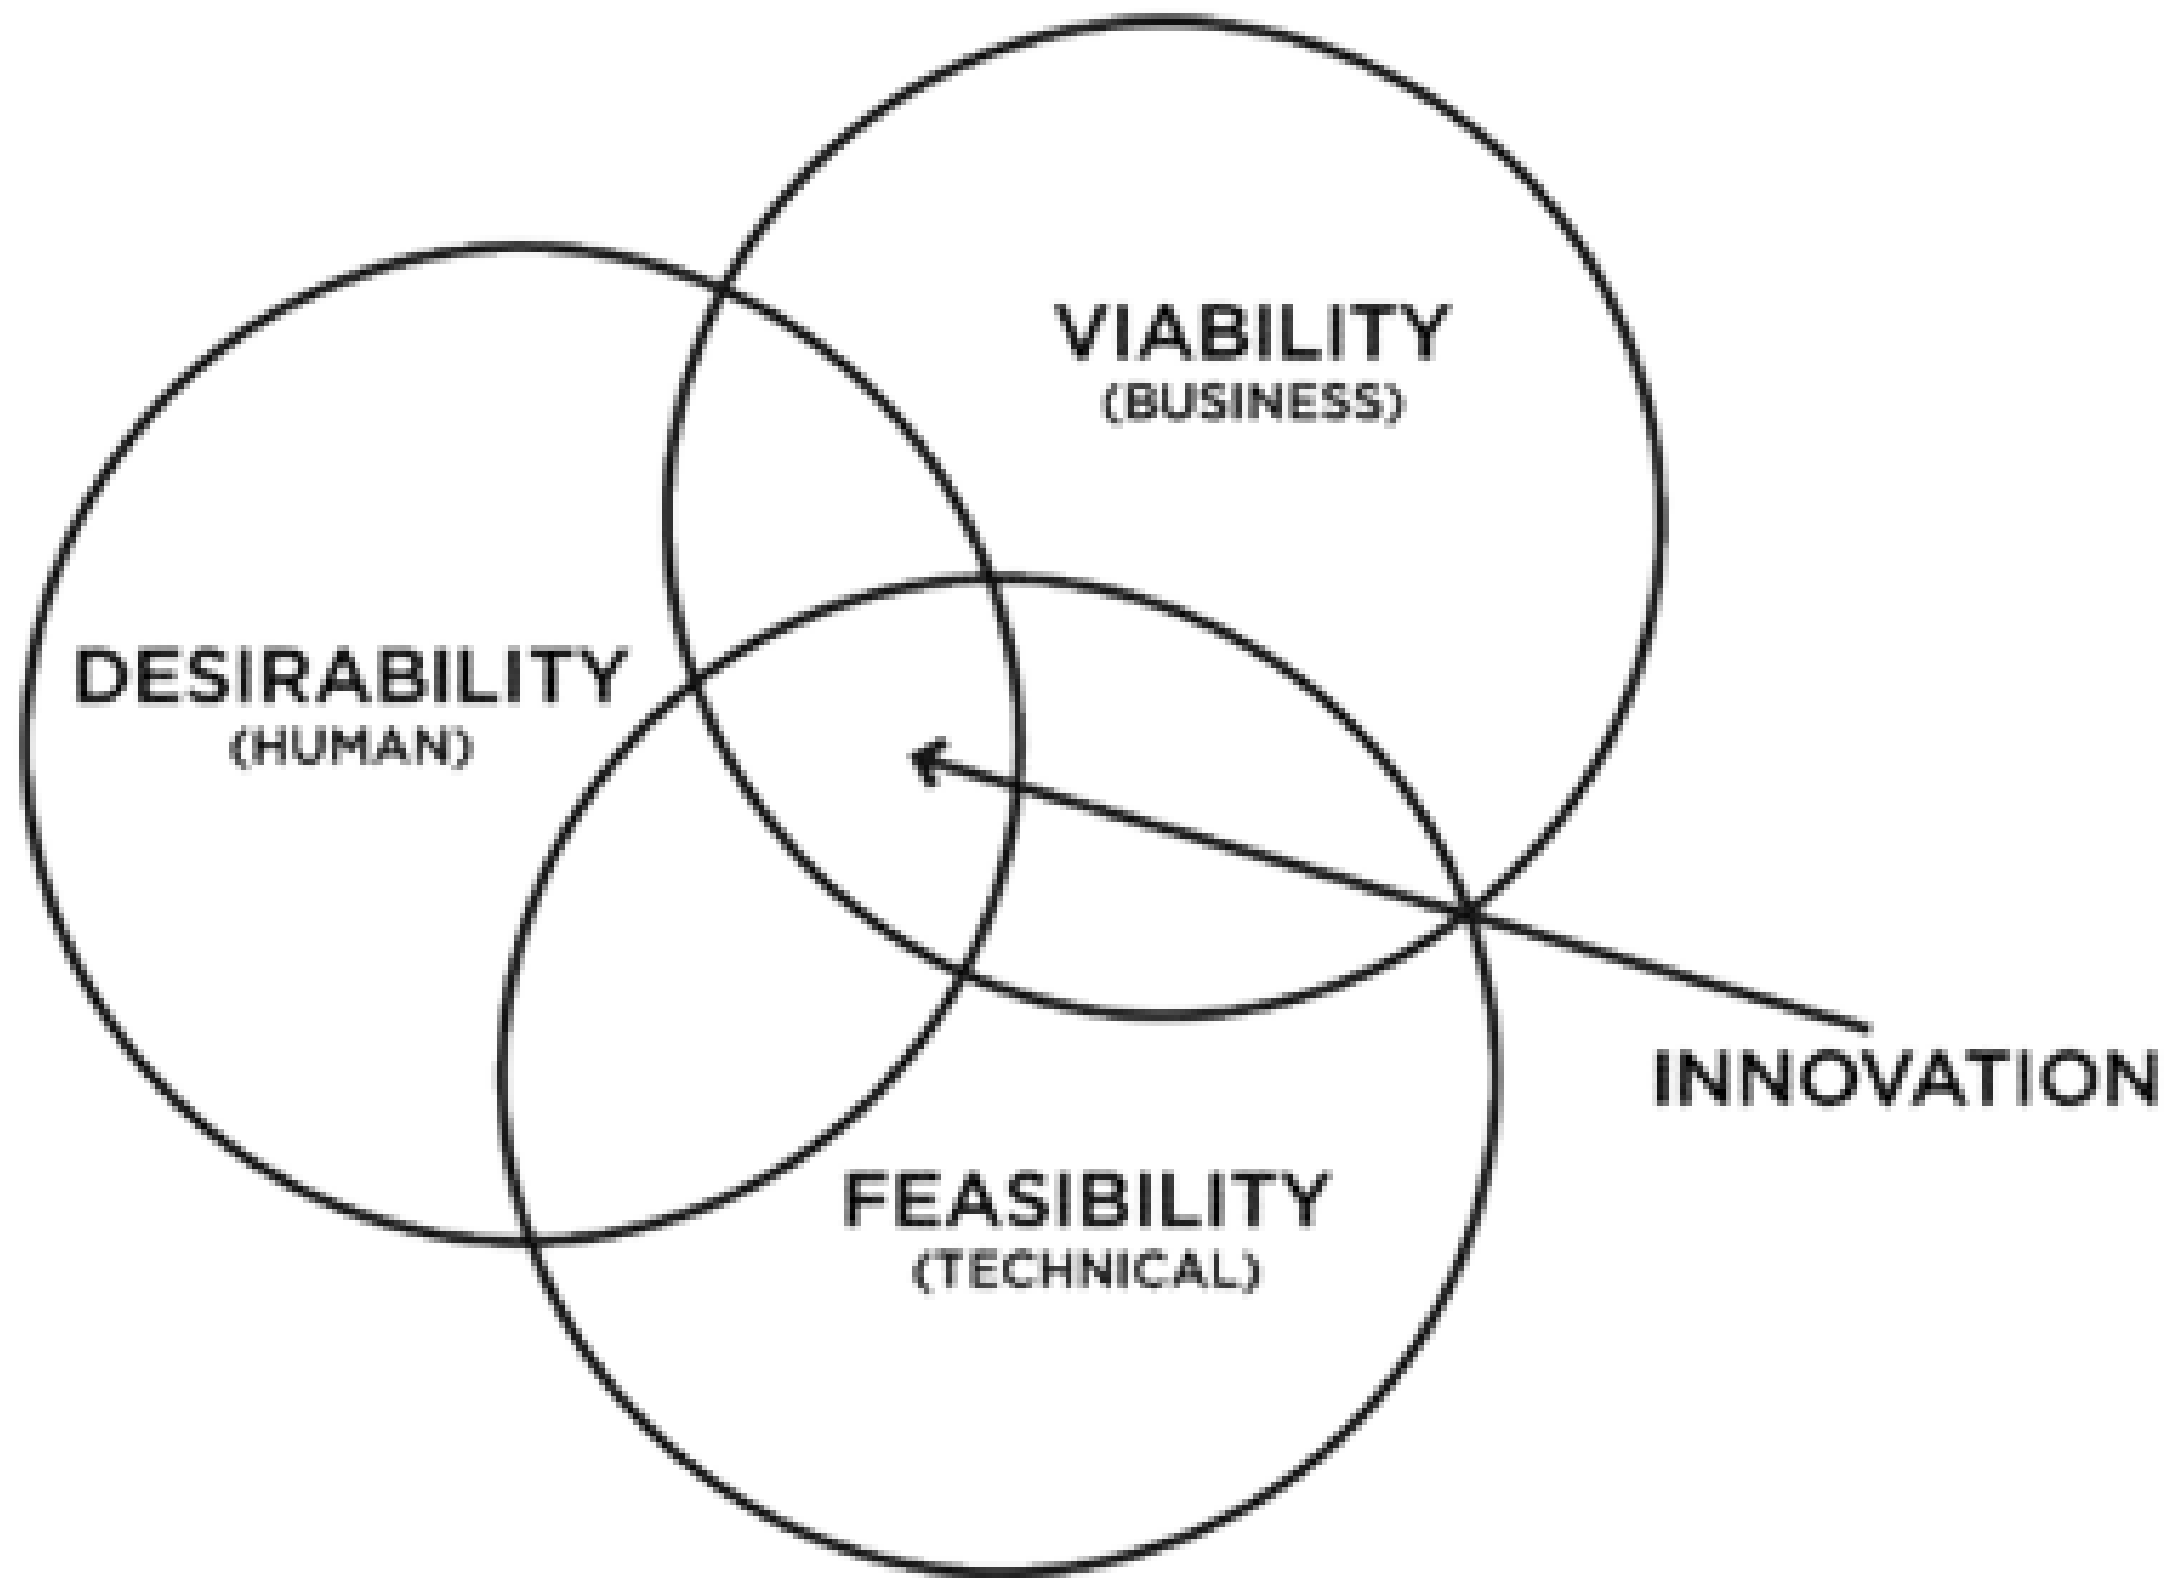

Business

DESIGN

Engineering

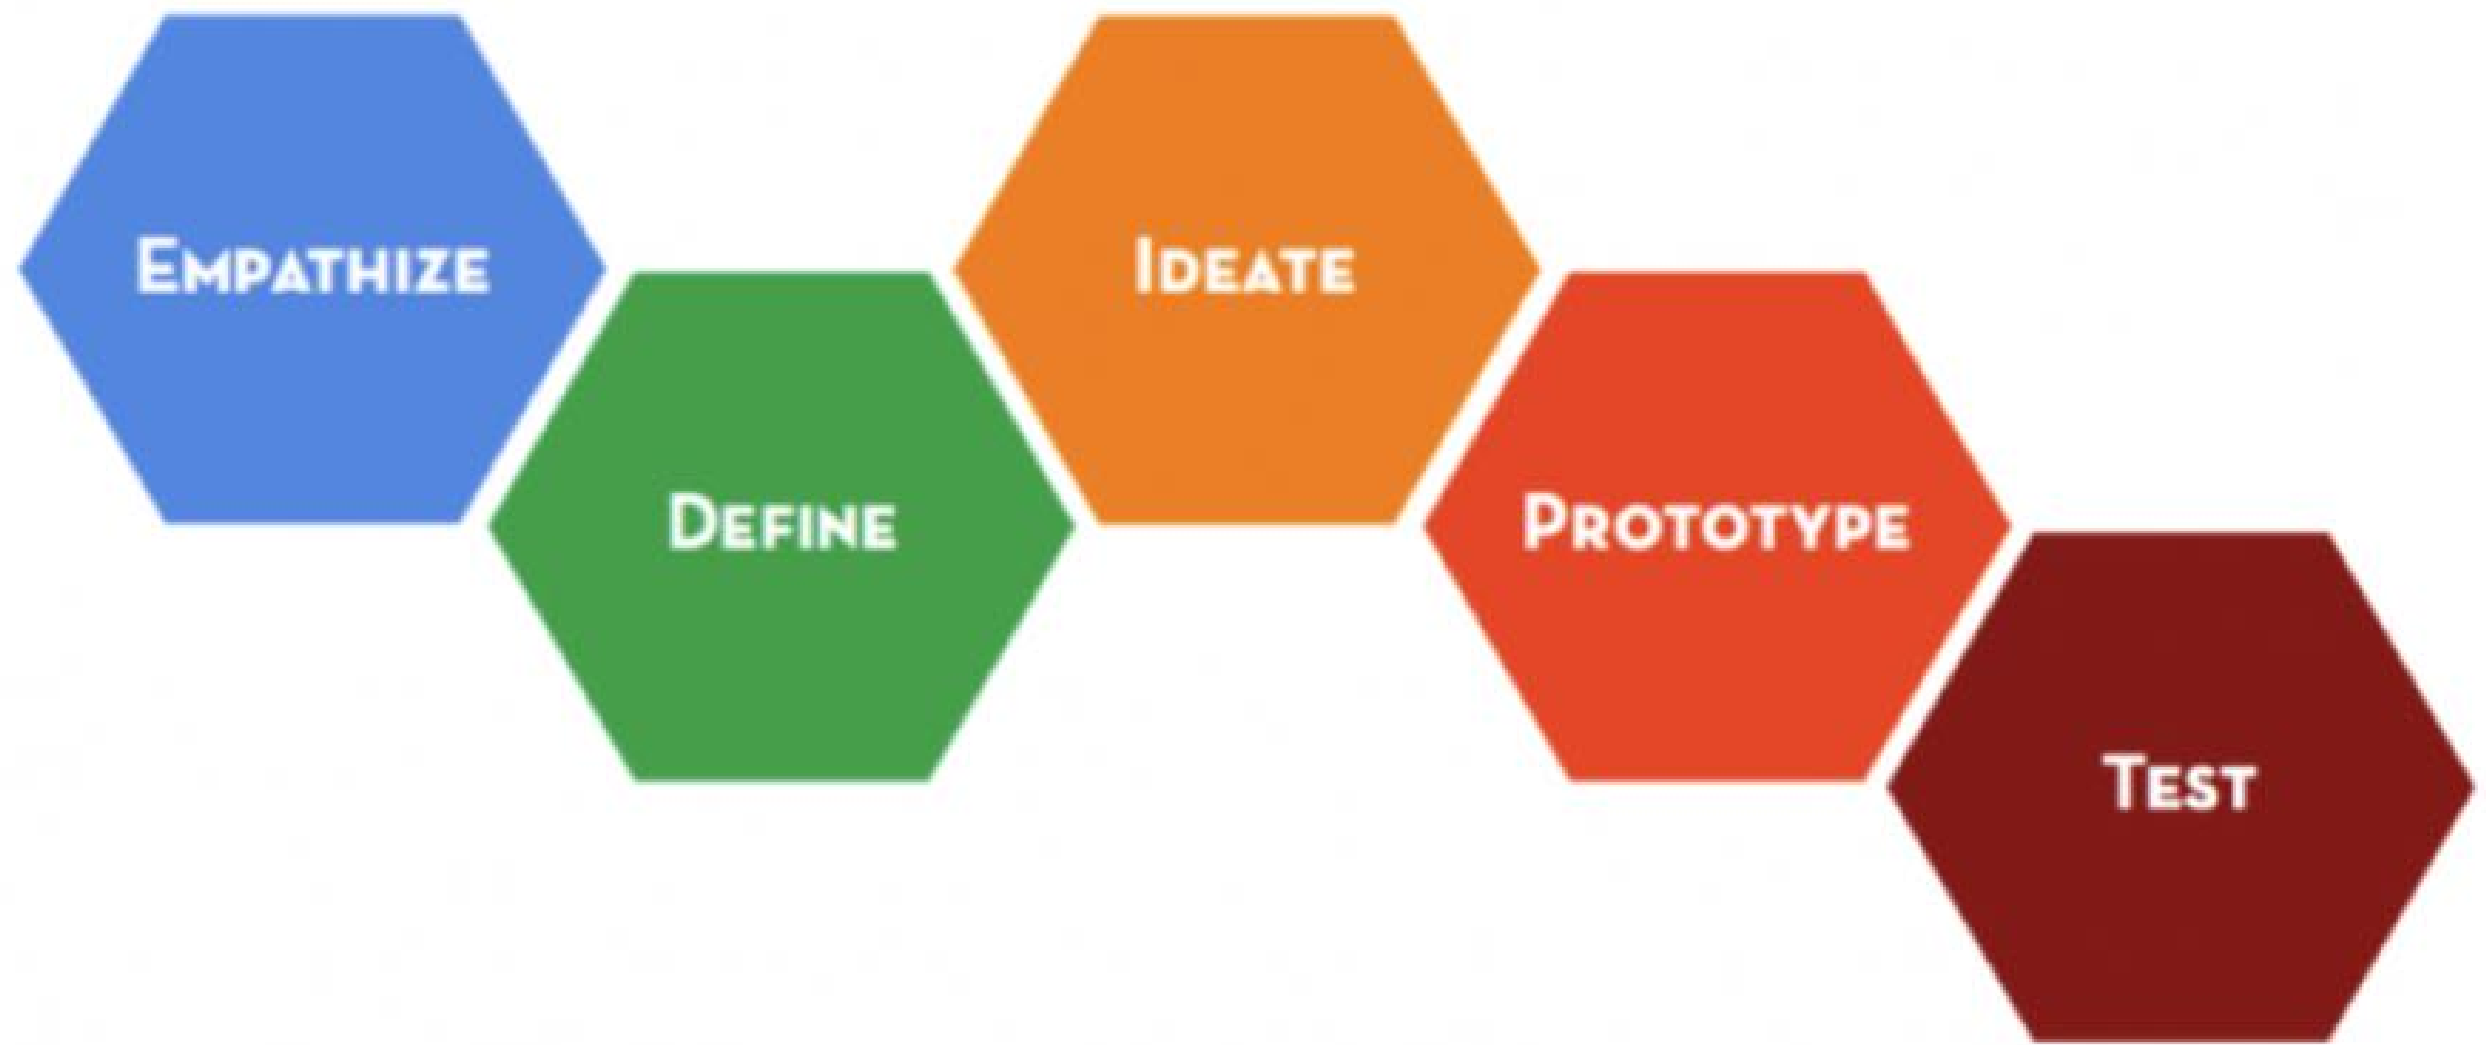

The Three Goals of Design Thinking

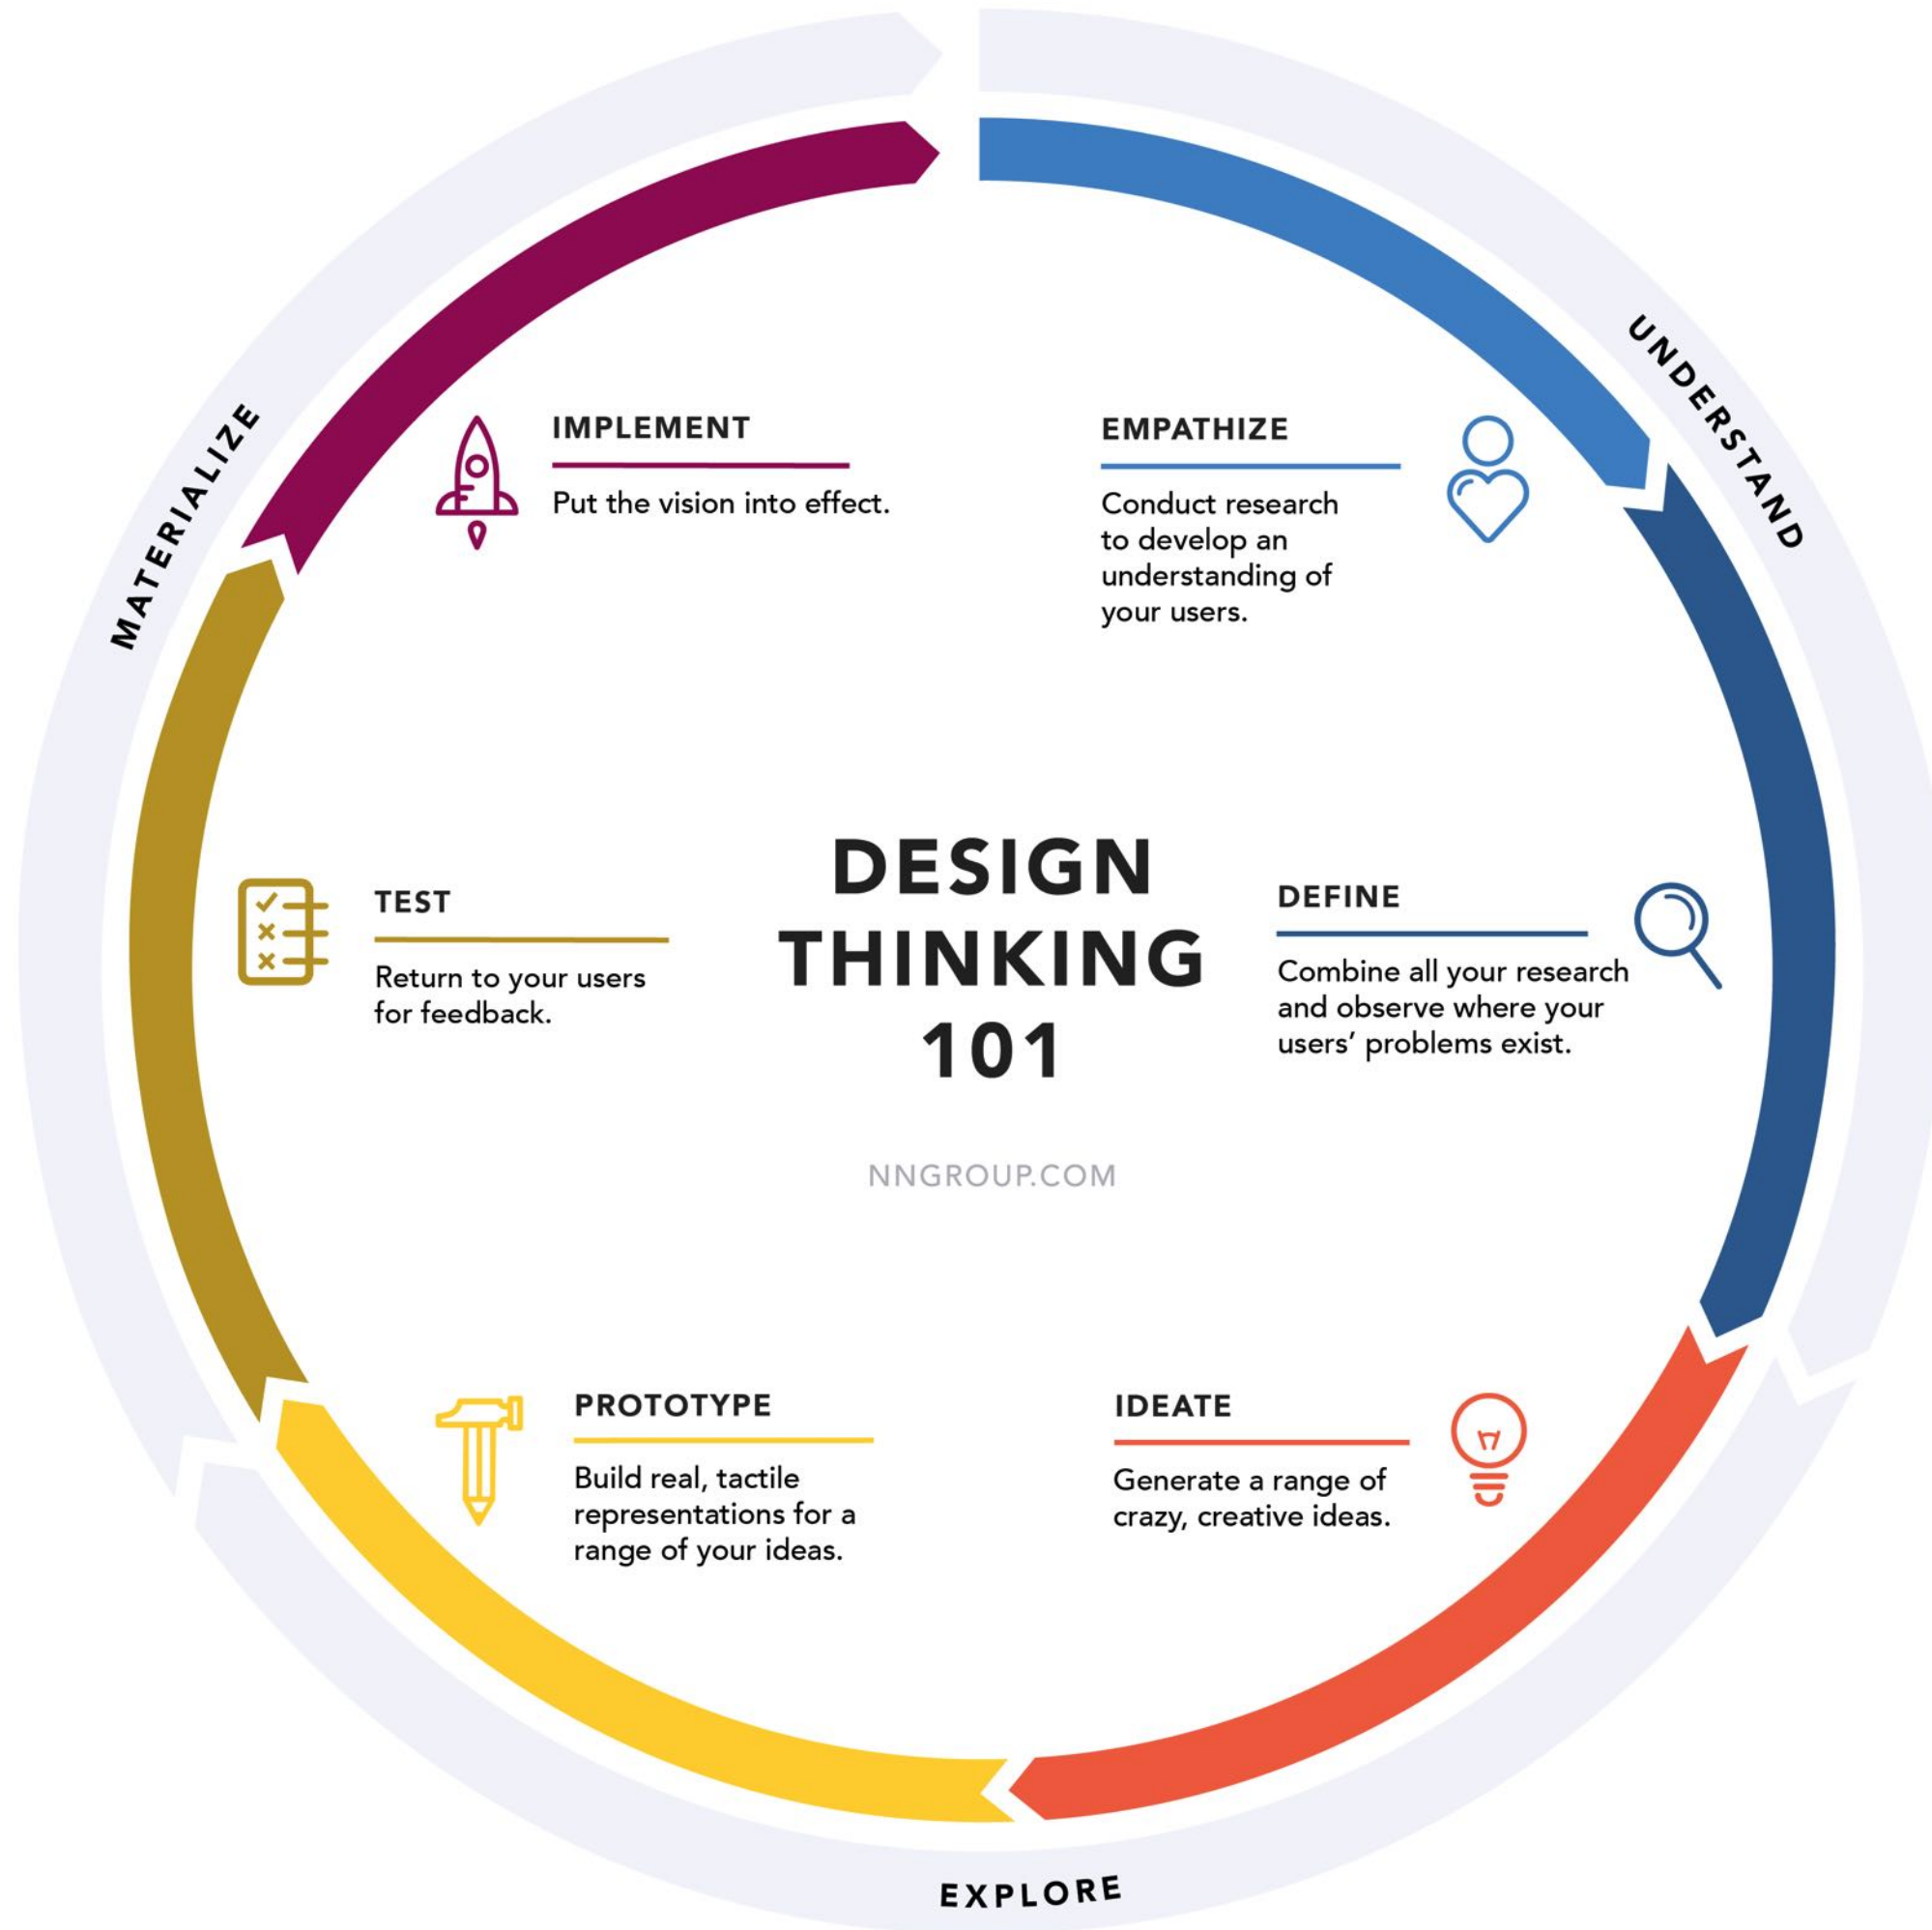

- To be desirable by people
- To be technologically feasible
- To be economically viable

Elements of Design Thinking

- Empathize
- Synthesize (i.e. Frame)
- Ideate / Brainstorm
- Prototype / Evaluate

problem

Usability Means...

Usability Means...

Usability means that a person using a system finds it easy to understand and use

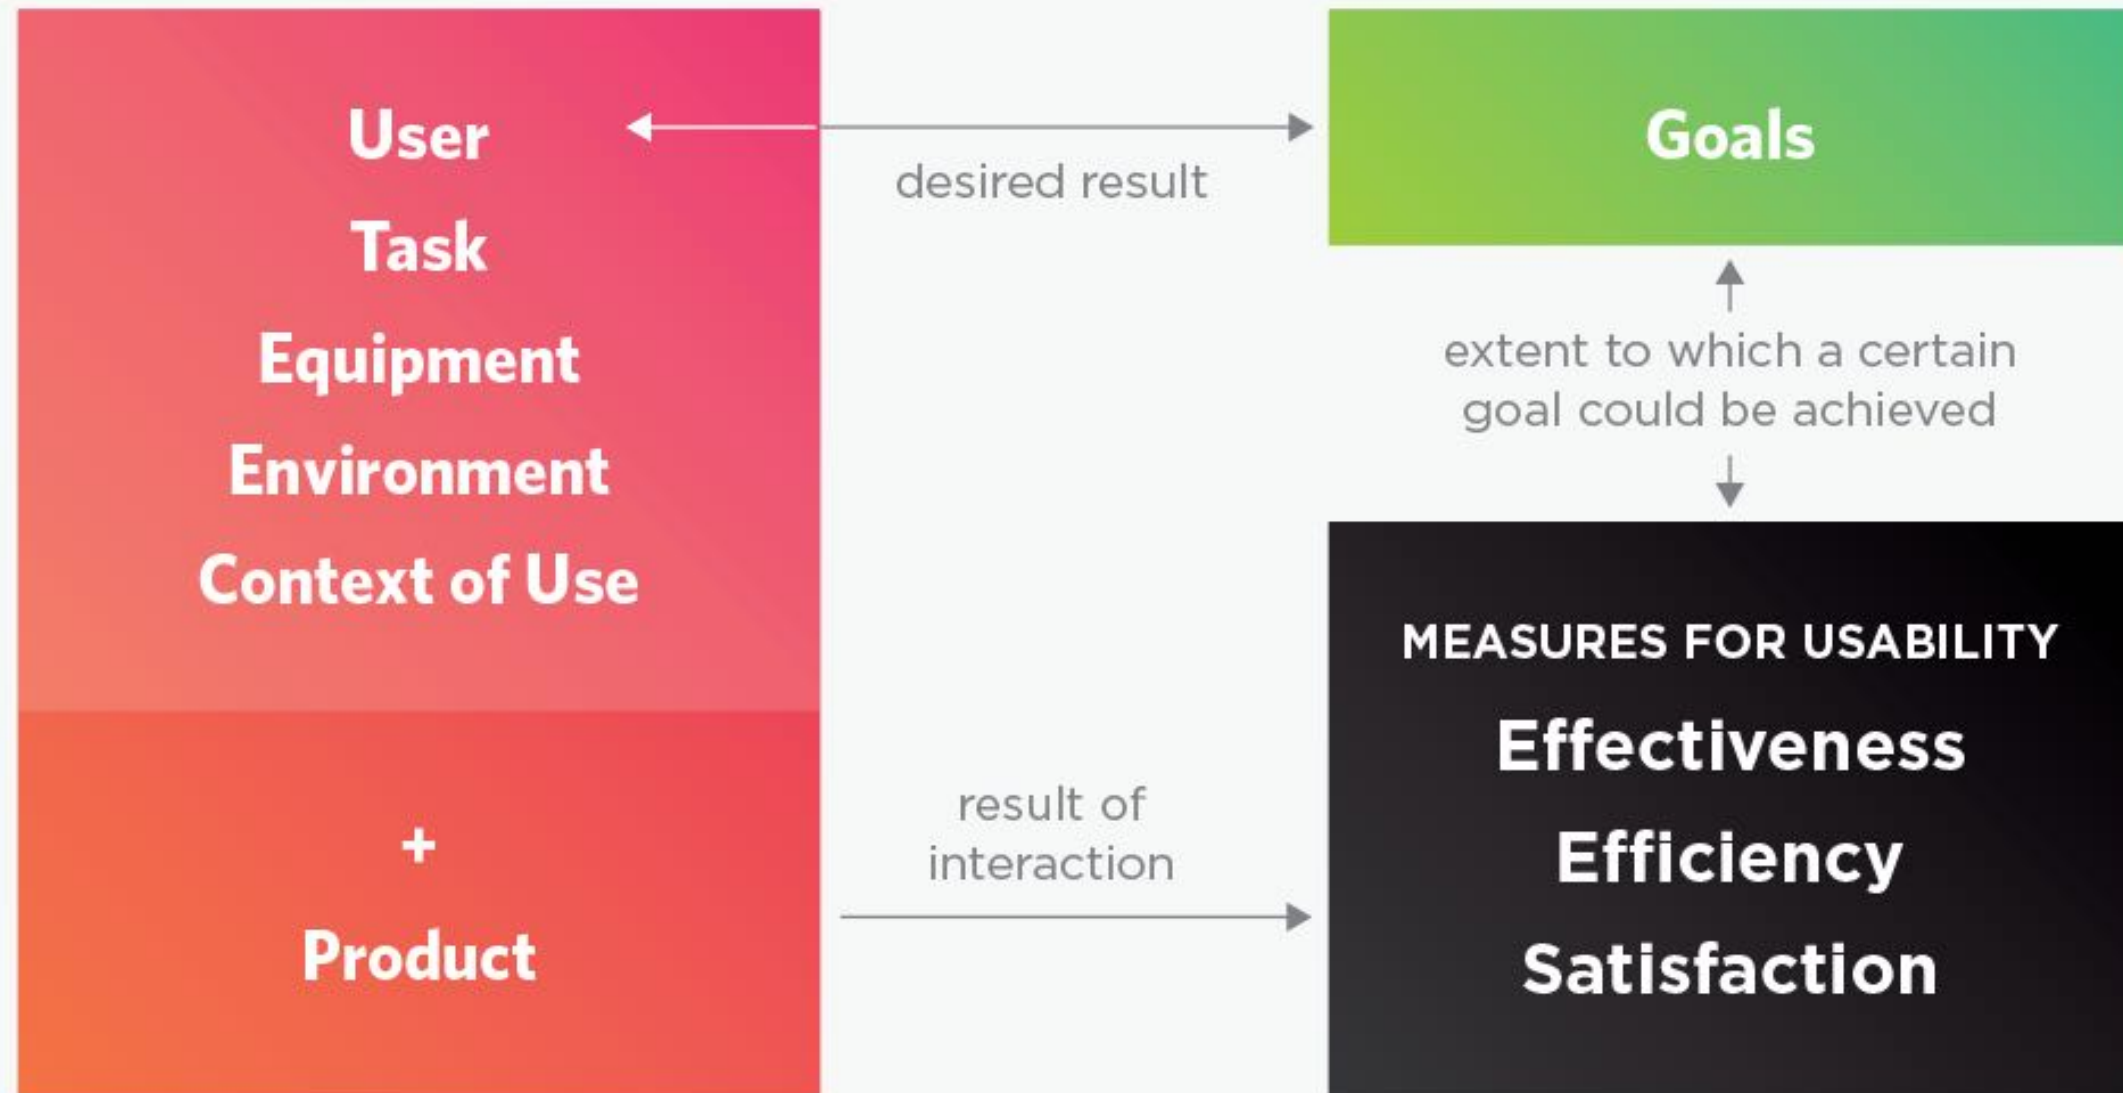

Usability Means...

A usable system allows a person to focus on their tasks,
and not on the system itself

Usability Means...

A usable system most often does what a person expects

GUIDANCE ON USABILITY FROM ISO 9241-11

What is Usability?

More specifically, usability can be defined as:

- A measurement
- A design approach

Usability as a Measurement (as defined by Jakob Nielsen)

- Learnability
- Efficiency
- Memorability
- Error Rate
- Satisfaction

Learnability

Learnability – how easy is it for novice users to work with the system?

Efficiency

Efficiency – how efficient is it for experienced users to work with the system?

Memorability

Memorability – how easy is it for less frequent users to remember how to use the system?

Error Rate

Error Rate – how many errors (on average) do users make when working with the system?

Satisfaction

Satisfaction – how pleasant do users find the system to work with?

Activity: Usability Elements

How would we consider trade-offs, such as Learnability vs Efficiency?

Source: IBM

Time for More Questions & Discussion

- What we've covered in this section
 - Overview of usability
 - Usability as a measurement
 - Usability iceberg
- Coming up
 - Usability as a design approach

Usability as a Design Approach

- User-centered design (UCD)
- Both a methodology and philosophy

USEFUL
USEABLE
DESIRABLE

Designing a Useful Product (by Scott McGregor)

1. Internal combustion engine
2. Four wheels with rubber tires
3. A transmission connecting the engine to the drive wheels
4. Engine and transmission mounted on a metal chassis
5. A steering wheel

Designing a Useful Product (by Scott McGregor)

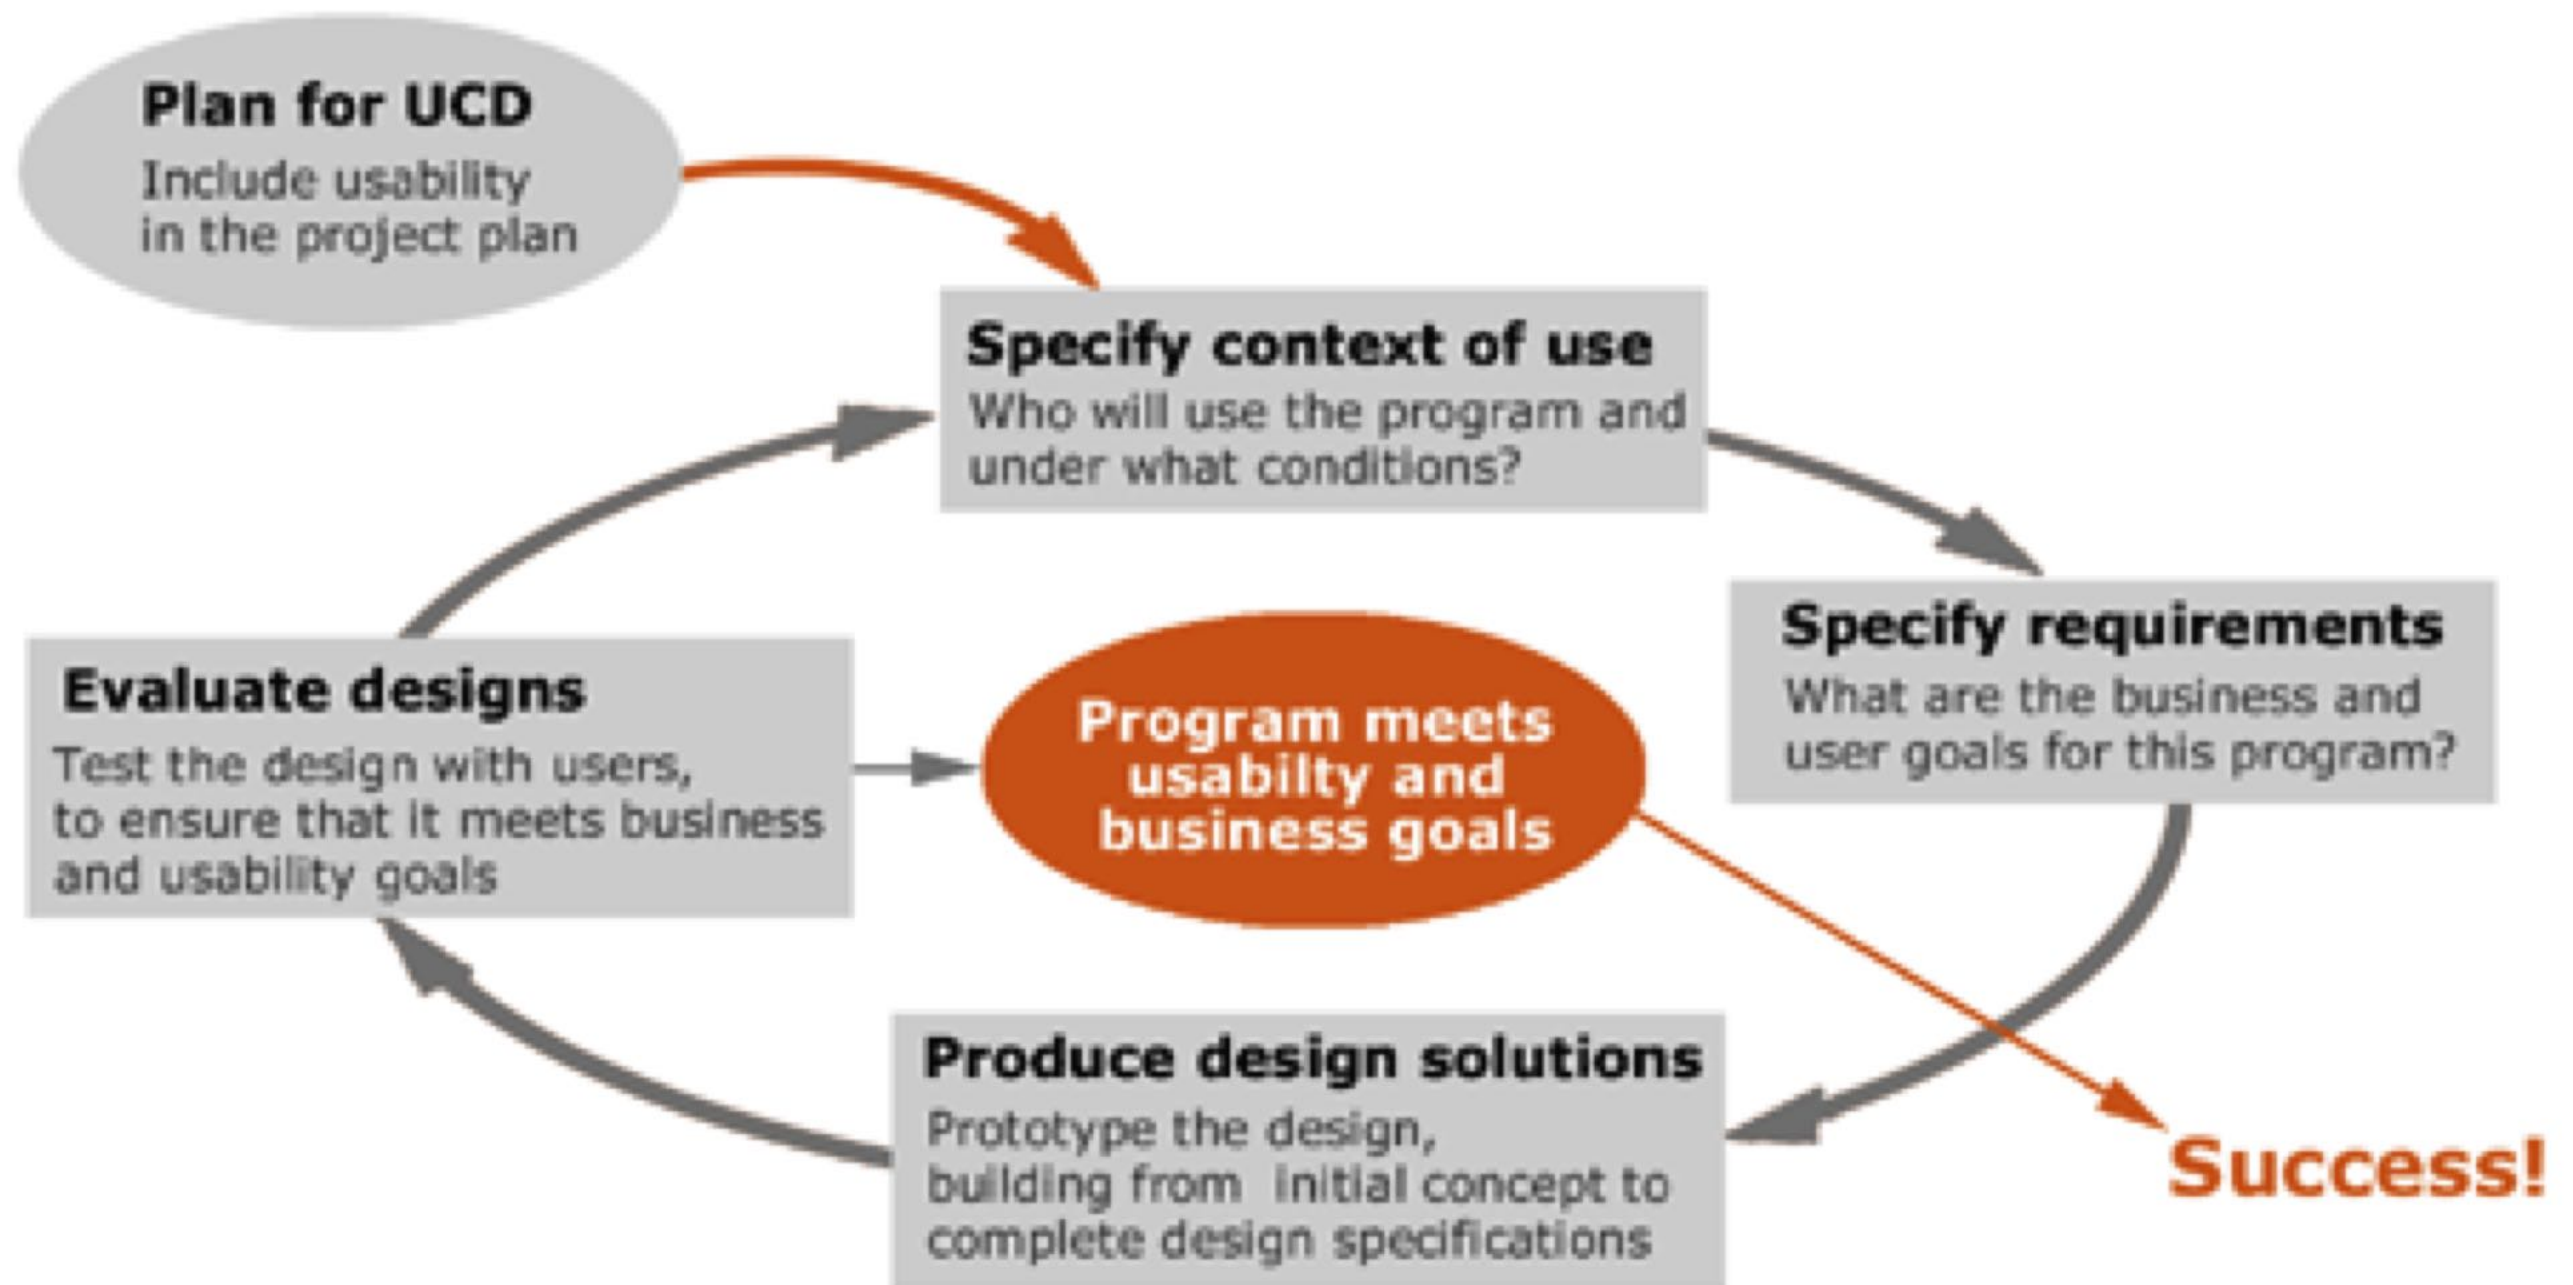

1. Internal combustion engine
2. Four wheels with rubber tires
3. A transmission connecting the engine to the drive wheels
4. Engine and transmission mounted on a metal chassis
5. A steering wheel
6. To cut grass quickly and easily
7. To be comfortable to sit on

Aspects of an Enjoyable Product

- Aesthetics
- Appeal
- Delight
- Fun
- Engagement
- Emotions

Case Study: Making an Enjoyable Product
